DETAILED ACTION***Response to Amendment***

Amendment filed 4/11/06 forms the basis for this office action. In said Amendment applicant substantially amended claims 2 and 16, as well as objected-to claim 13, and added new claims 18 and 19. In light of the steady increase of independent claims the following Election/Restriction requirement is issued.

Election/Restrictions

1. Applicant is required under 35 U.S.C. 121 to elect a single one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims appear to be generic):
 - Species 1: a semiconductor integrated circuit comprising signal transmission line of micro-strip structure composed of a signal line and a ground plate, with at least through hole is formed in said signal line only (Figure 1, pages 7-9).
 - Species 2: a semiconductor integrated circuit comprising signal transmission line of micro-strip structure composed of a signal line and a ground plate, with at least through hole is formed in said ground plate only (Figure 2, pages 9-12).
 - Species 3: a semiconductor integrated circuit comprising signal transmission line of micro-strip structure composed of a signal line and a

Art Unit: 3663

ground plate, with at least through hole is formed in said signal line and in said ground plate only (Figure 7, pages 12-15).

The separately disclosed species are patentably distinct because of the distinction on electromagnetic characteristics, in addition to function, between a signal carrying stripline and a ground plate, and the change in impedance, capacitance and resistance, caused by a through hole or through holes in (1) only the signal line, (2) only the ground plate, (3) both signal line and ground plate.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
